# ABOUT COMPANY

PT. MEGA COMMODITY GLOBAL is a company that provides commodity products from Indonesia on a worldwide scale.

With the motto "Quality above everything", PT. MEGA COMMODITY GLOBAL is able to meet the needs of consumers. In the field of product exports, we uphold professionalism, high quality products, reliable prices, and friendly service.

Our product included but wasn't limited to any kind of coffee, tea leaves, cocoa, vanilla and charcoal. We also provide Commodities from Indonesia. Excellent service, the best price and high quality products provided to customers are our commitment to satisfying every single kind of customer with various requests.

Our value is to develop local farmers in Indonesia to make high quality commodities, enhancing their plantations to produce high standard and qualified goods. So, we cultivate farmer groups and assist their activities to get the best results.

We committed to providing to make our standard merit international standards and demand directly from the farmers.

**YOUR TRUSTED  
EXPORT PARTNER**

# OUR TEAM STATEMENT

Our commitment to ensure excellent service is to ensure high quality standards and hygiene treatment of our product commodities for good, to catch up with international standards and to provide worldwide demand.

We are concerned with enhancing farmers knowledge about international standards and demand by continuously improving their processing techniques. We also agreed that helping farmers helps a nation, and by helping these farmers continue with agriculture, we strengthen the connection between farmer groups from variant com-

Our effort is to empower smallholder farmers because smallholder farmers are essential to our business as well as the protection of our planet, so we assist their plantation activity with our programs to empower and support them.

# GREEN COFFEE BEAN

Indonesia's coffee is well known for its strong and exotic cup profiles. We are the exporter of green coffee in Indonesia with an unrivaled presence across its islands.

The stories behind our coffee are not just about aroma, taste and quality, we cultivate plantations with profitable farmers and biodiverse eco-systems. With our year-round presence in origin, our buying teams have years of experience selecting the best coffees, and through our processing infrastructure, we can customize all our finished coffees to the quality and consistency requirements of our customers.

01

## Arabica

Indonesian tropical exotic coffee that we process from fresh cherries at our wet mills or wet-hull to produce high-quality washed and semi-washed arabica green beans. Premium-quality arabicas are also carefully selected and hand-picked.

- Our arabica plantation in 1.600-1.900 MASL
- beautiful characteristic taste of orange zest, pineapple, cinnamon, brown sugar, and tropical fruit.
- coffee moisture between 11% and 14%

## 02

# Robusta

Indonesia Robusta coffee beans are one of the most famous coffees in the world. Most Robusta coffees in Indonesia have a full body with low acidity. The signature flavors are dark chocolate, caramel, and spices.

Robusta beans do find their way into specialty coffee shops in the form of espresso blends. Blending Arabica and Robusta takes advantage of the best properties of both to produce a delicious espresso that is more than the sum of its

parts. The complex flavors and sweetness of the Arabica are enhanced by the heavy body, creamy mouthfeel, and rich crema of the Robusta.

- Our Robusta coffee plantation in 500-1.300 MASL
- Robusta has a distinctive taste with a bold body, nutty (walnut), low acid, mocca, and caramelized sugar aftertaste.
- Moisture between 11% and 14 %

## 03

- Wine Coffee (Fermented Process)

## Coffee Packaging :

Quantity	20 - 25 kg
Grain Pro	85 cm x 50 cm
PP Woven Bag	85 cm x 50 cm

# PREMIUM TEA

## 01 White Tea The Silver Needle

In gentle West Java, in the heart of a rich countryside blessed with mountains, hot springs, rice paddies and volcanoes, we cultivate this exceptional white tea on a magnificent plantation.

This organic tea is organically grown in the unspoiled fertile volcanic soil of Mount in West Java and watered from mountain-pristine spring water on the slopes of the Mountain. White Tea is a fully young tea that offers full body flavor and aroma. It is made from full leaves that originate only from the top leaf buds.

The taste is distinctively floral, with notes of honeysuckle, ripened stone fruit, melon and refreshing mint. This herb tea is high in antioxidants with polifenol (21,9%).

### White tea Package :

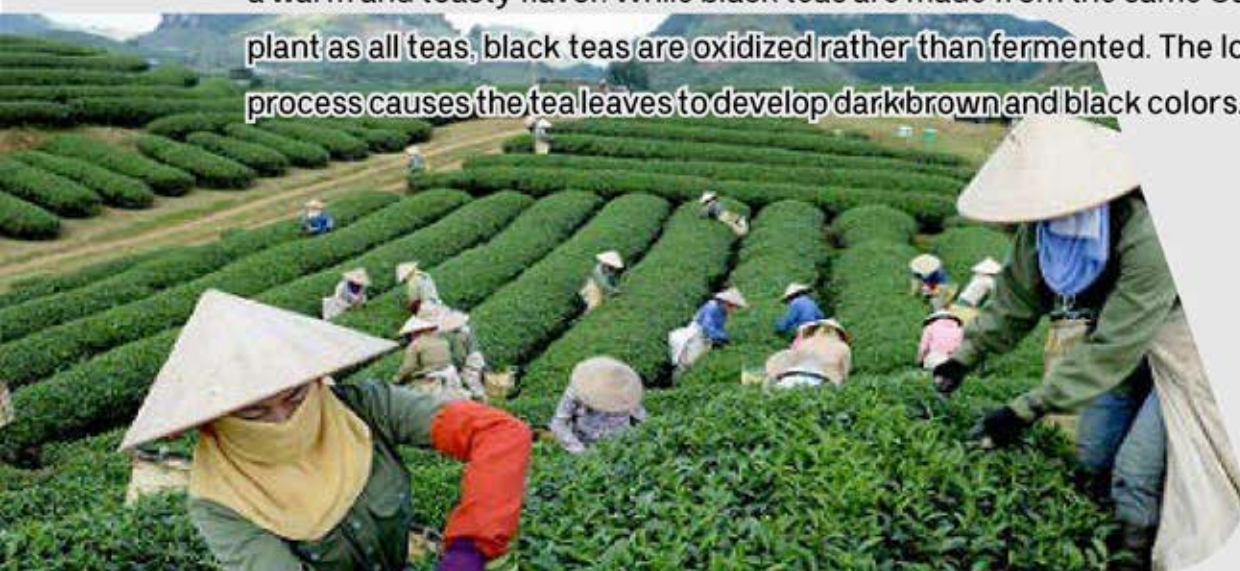

Quantity :

- 250 grams per pack
- 1 kg per box or customize the quantity in the box as inquiries
- Aluminum plastic foil per pack

## 02 Black Tea

Premium black teas are withered, rolled, oxidized, and fired in an oven, creating a warm and toasty flavor. While black teas are made from the same *Camellia sinensis* plant as all teas, black teas are oxidized rather than fermented. The longer oxidation process causes the tea leaves to develop dark brown and black colors.

### Black Tea Products :

- Pekoe Fanning (PF)
- Broken Mix (BM)
- Dust
- Broken Pekoe (BP 1)
- Fanning (Fann)

### Black tea packaging :

3 Plies 70 Gsm High Strength Virgin Standard Sack Kraft Paper and Inner ply of 70 Gsm High Strength Virgin Standard Sack Kraft Paper Laminated to 19 Gsm Metalized Polyester with 20 Gsm Low Density Polyethylene

03

## Vanilla Pods / Beans

A bulk worldwide supplier of vanilla commodity from Indonesia. We provide Tahiti and Planifolia vanilla bean from Indonesia.

Tahitian Vanilla - comes from the fruit of an orchid variety called vanilla "Tahitensis" which is a completely different species than the Bourbon (planifolia) varieties from Madagascar.

Vanilla Planifolia - Java Bourbon is the most commonly used vanilla around the world. Vanilla Planifolia has the sweetness aroma of vanilla with a little woody/oaky

- Average length 14 cm - 21 cm up
- Strong Aromatic, Moist, Plum, Old ripe harvest, No mold, No split.

1 Package = 1kg  
1 Carton = 25Kg

# COCOA

## Cocoa Beans Whole

Over the years, chocolate has become one of the most favorite delicacies across the globe. The cacao tree, as the main source of cacao beans, became a sought-after crop and hence, cultivated in different regions, particularly in the countries near the equator including Indonesia.

We have a careful ethical process for selecting our partner cocoa producers. The cocoa beans we use to make our chocolate come from the tropical forests and rain-forests of Indonesia. Cocoa beans are the seeds of the cacao tree. They are the key ingredient for chocolate bonbons, confectionery and beverages. The beans are harvested, fermented and dried.

### Cocoa Beans Package :

Quantity :

- 60 Kg per bag
- Gunny Bag

# BRIQUETTES CHARCOAL

Our finest 100% coconut shell charcoal briquettes, we make coconut shell charcoal briquettes for both Shisha (hookah) and barbeque use. Our briquettes are made using only the highest-quality coconut shell charcoal (which we manufacture ourselves), featuring high fixed carbon and low ash content. Due to the low volatile matter content of the briquettes, no smoke or odors are produced during the lighting of the briquettes. Our high fixed carbon charcoal produces a lot of heat and has a long burn time of up to 2 hours during a smoking session. Minimal ash is produced during burning, allowing for easy clean-up and the ash color is a pure white or gray. Our briquettes are of high strength and do not easily crack or break even after multiple drops.

The higher the fixed carbon, the higher the heat produced, the longer the briquettes burn and less ash is produced during burning. Our coconut shell briquettes are hard and durable thanks to the high-pressure presses used in production and strict monitoring of the drying process. Our briquettes are uniformly and neatly shaped and can be made in a variety of shapes and sizes. Strict quality control at all stages of production ensures consistently high quality. We can also pack the briquettes according to your exact specifications.

# Specification :

Ash Content	2-3%
Ash Color	White/Silver
Fixed Carbon	Minimum 80%
Moisture	Maximum 5%
Volatile Matter	Less than 14 %
Lighting Time	Up to 10 minutes (Depending on size and shape of briquette)
Lighting Time	90 - 120 minutes (Depending on size and shape of briquette)
Size Variant	20x20x20mm
	22x22x22mm
	25x25x25mm
	26x26x26mm

## Briquettes Packaging :

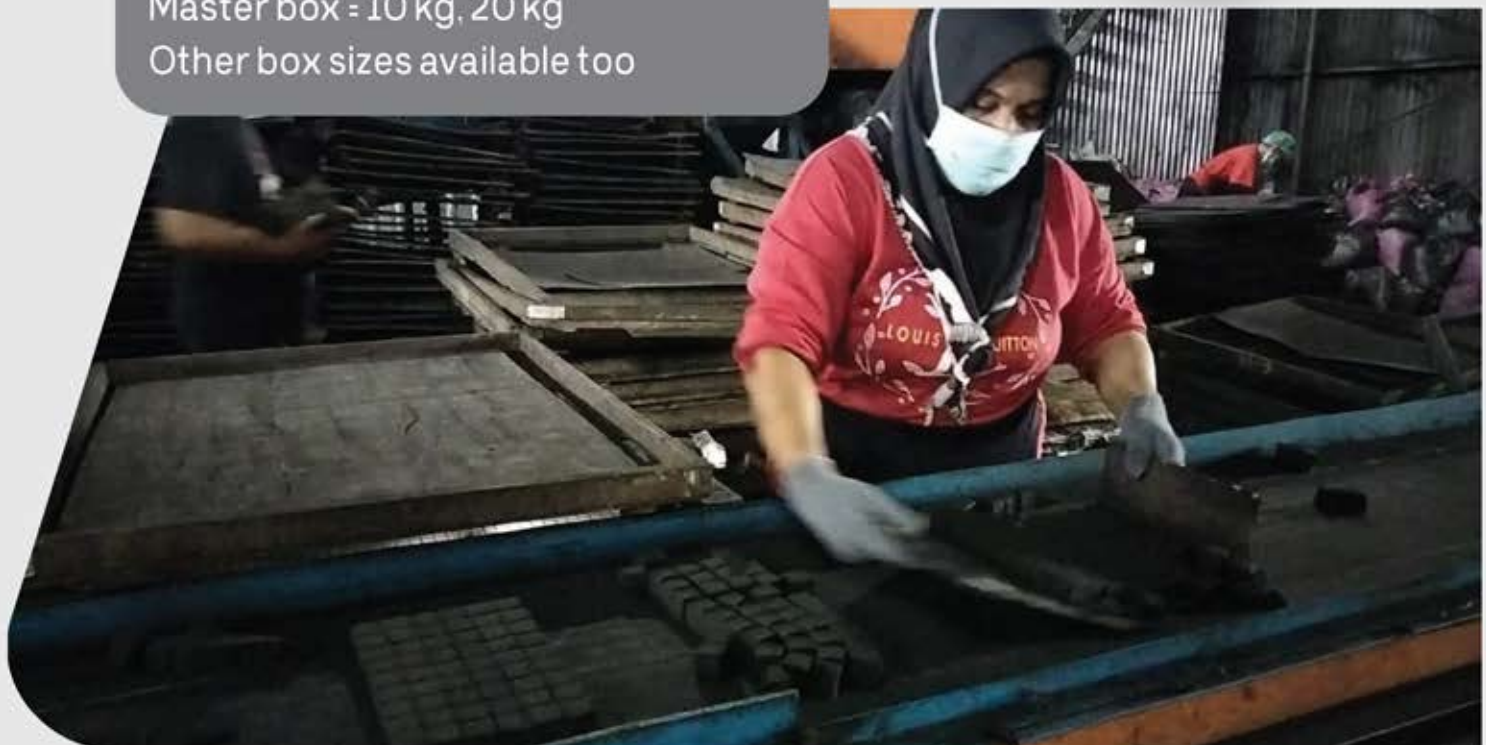

- 10 kg per Pack
- to order a shape or size, please contact us.

Customize box size :

Small box - 1 kg, 500 grams, 250 grams

Master box - 10 kg, 20 kg

Other box sizes available too
